

# **CNN February 2018**

The study was conducted for CNN via telephone by SSRS, an independent research company. Interviews were conducted from **February 20, 2018 – February 23, 2018** among a sample of **1,016** respondents. The landline total respondents were **405** and there were **611** cell phone respondents. The margin of sampling error for total respondents is +/-3.7 at the 95% confidence level. The design effect is 1.42. More information about SSRS can be obtained by visiting <u>www.ssrs.com</u>. Unless otherwise noted, results beginning with the March 31-April 2, 2006 survey and ending with the April 22-25, 2017 survey are from surveys conducted by ORC International. Results before March 31, 2006 are from surveys conducted by Gallup.

# EMBARGOED FOR RELEASE: Monday, February 26 at Noon

Now turning to the elections for Congress which will be held this year...

#### (Respondents who are registered voters N=909)

Q3. (H2) How enthusiastic would you say you are about voting for Congress this year -- extremely enthusiastic, very enthusiastic, somewhat enthusiastic, not too enthusiastic, or not at all enthusiastic?\*\*

	Extremely enthusiastic	Very enthusiastic	Somewhat enthusiastic	Not too enthusiastic	Not at all enthusiastic	No opinion

# MORE ON METHODOLOGY

A total of **1,016** adults were interviewed by telephone nationwide by live interviewers calling both landline and cell phones. Interviews were conducted in English and Spanish. Interviews were conducted February 20-23, 2018. Among the entire sample, **33**% described themselves as Democrats, **23**% described themselves as Republicans, and **44**% described themselves as independents or members of another party.

All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, and telephone usage.

Results for the full sample have a margin of sampling error of **+/-3.7** percentage points. For the sample of **909** registered voters, it is **+/-3.9** percentage points.

Crosstabs on the following pages only include results for subgroups with enough unweighted cases to produce a sampling error of +/-8.5 percentage points or less once adjusted for design effect. Some subgroups represent too small a share of the national population to produce crosstabs with an acceptable sampling error. Interviews were conducted among these subgroups, but results for groups with a design-effect adjusted sampling error larger than +/-8.5 percentage points are not displayed and instead are denoted with "N/A".

3. (H2) How enthusiastic would you say you are about voting for Congress this year -- extremely enthusiastic, very enthusiastic, somewhat enthusiastic, not too enthusiastic, or not at all enthusiastic? Base: Respondents who are registered to vote
