

CNN February 2018

The study was conducted for CNN via telephone by SSRS, an independent research company. Interviews were conducted from **February 20, 2018 – February 23, 2018** among a sample of **1,016** respondents. The landline total respondents were **405** and there were **611** cell phone respondents. The margin of sampling error for total respondents is +/-3.7 at the 95% confidence level. The design effect is 1.42. More information about SSRS can be obtained by visiting www.ssrs.com. Unless otherwise noted, results beginning with the March 31-April 2, 2006 survey and ending with the April 22-25, 2017 survey are from surveys conducted by ORC International. Results before March 31, 2006 are from surveys conducted by Gallup.

Q15. As you may know, a U.S. government program allows some immigrants who were brought to the U.S. illegally as children to remain in the U.S. without risk of deportation. To qualify, immigrants had to be under the age of 30 as of 2012, have no criminal record, and be a student, in the military or have earned a high school diploma. Do you think the U.S. should:

	Continue this policy and allow immigrants who meet these qualifications to remain the U.S.	End this policy and allow immigrants to be deported even if they do meet these qualifications	No opinion

MORE ON METHODOLOGY

A total of **1,016** adults were interviewed by telephone nationwide by live interviewers calling both landline and cell phones. Interviews were conducted in English and Spanish. Interviews were conducted February 20-23, 2018. Among the entire sample, **33%** described themselves as Democrats, **23%** described themselves as Republicans, and **44%** described themselves as independents or members of another party.

All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, and telephone usage.

Results for the full sample have a margin of sampling error of **+/-3.7** percentage points. For the sample of **909** registered voters, it is **+/-3.9** percentage points.

Crosstabs on the following pages only include results for subgroups with enough unweighted cases to produce a sampling error of +/-8.5 percentage points or less once adjusted for design effect. Some subgroups represent too small a share of the national population to produce crosstabs with an acceptable sampling error. Interviews were conducted among these subgroups, but results for groups with a design-effect adjusted sampling error larger than +/-8.5 percentage points are not displayed and instead are denoted with "N/A".
