#### **MORE ON METHODOLOGY**

A total of **1,003** adults were interviewed by telephone nationwide by live interviewers calling both landline and cell phones. Interviews were conducted in English and Spanish. Among the entire sample, **32%** described themselves as Democrats, **25%** described themselves as Republicans, and **44%** described themselves as independents or members of another party.

All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, and telephone usage.

Results for the full sample have a margin of sampling error of +/- 3.8 percentage points. For the sample of 914 registered voters it is +/- 4.0 percentage points. For the subset of 456 Democrats and Democratic-leaning independents, it is +/-5.7 percentage points, and for the 448 Republicans and Republican-leaning independents, it is +/-5.5 percentage points.

Crosstabs on the following pages only include results for subgroups with a minimum n=125 unweighted cases. While interviews were conducted among a representative sample of the adult population of the United States, results for subgroups with fewer than n=125 unweighted cases are not displayed and instead are denoted with "N/A" because they are too small to be projectable to their true values in the population.
