THE ES&S COMMITMENT

SECURITY

ES&S is committed to accuracy and security in its products to advance the voting process. We take pride in our history of close relationships with federal, state, and local government agencies to enhance elections. We work hard on the security of our products, and we are constantly strengthening and improving them. Our products are designed to federal security voting standards and undergo rigorous internal testing, quality assurance, vulnerability scans, and third-party test review before they are ever shipped to customers, and we have staked our reputation on the security of our products.

POLICYMAKERS

Election officials know best the many factors that shape their election system locally. We respect the fact that different election officials may want different approaches, so our priority and focus is to provide the most secure, most efficient and most intuitive product possible based on the policy decisions state and local governments make.

PAPER & AUDITING

ES&S strongly supports the use of voting equipment that provides a paper record as well as increased post-election auditing. A verifiable paper record provides voters with a means to verify that their selections were captured accurately, and provides a means to audit the stored electronic results. A post-election audit checks that the equipment and procedures used to tabulate votes during an election worked correctly, and that the election returned an accurate outcome.

THE ES&S VISION

We will provide products and services of exceptional quality and value to maintain voter confidence and enhance the voting experience.

ES&S PRODUCTS

ExpressVote®
Universal Voting System

DS200®
Precinct Scanner & Tabulator

ExpressVote XL™
Full-Face Universal Voting System

High-Throughput Scanner & Tabulator

DS850®
High-Speed Scanner & Tabulator

ES&S SECURITY PHILOSOPHY

Nothing is more important to Election Systems & Software than protecting America's democracy through secure and accurate elections. That's why every ES&S product reflects the company's three-part security philosophy:

- **Design:** all products are designed, without compromise, to meet the latest and ever-evolving standards in security, accuracy and reliability.
- **Testing:** in addition to ES&S testing protocols, all systems are rigorously tested and certified by the federal Election Assistance Commission (EAC), which reflects security and performance standards developed by scientists, academia and election officials. The ES&S testing protocol also involves testing by independent, accredited laboratories. ES&S voting systems must adhere to secure practices for the creation, transfer and storage of election files and data, and must employ encryption and digital signing for all data in transit using cryptographic modules that meet the Federal Information Processing Standard.
- **Implementation:** the entire ES&S team is devoted to ensuring that each piece of technology performs as expected on election day, helping election officials uphold the laws of their state which mandate strict physical security and tight chain of custody of all voting machines.

Perhaps most importantly, ES&S's essence—its very being—is predicated on providing America with secure, accurate elections. Every person at ES&S holds themselves, and each other, accountable for this mandate, and is proud to serve a role in this noble purpose.

ES&S EMPLOYEES ARE LOCAL

Election Systems & Software has been dedicated to secure, accurate elections throughout North America for nearly 40 years. The ES&S team is committed to developing integrated voting solutions that improve the voting experience, are secure, accurate and flexible, meeting a variety of jurisdictions' needs and voter preferences.
