

## OVERVIEW

The study was conducted for CNN via telephone by SSRS, an independent research company. Interviews were conducted from **March 4-7, 2020** among a sample of **1,211** respondents. The landline total respondents were **443** and there were **768** cell phone respondents. The margin of sampling error for total respondents is +/- **3.3** at the 95% confidence level. The design effect is **1.37**. More information about SSRS can be obtained by visiting [www.ssrs.com](http://www.ssrs.com). Unless otherwise noted, results beginning with the March 31-April 2, 2006 survey and ending with the April 22-25, 2017 survey are from surveys conducted by ORC International. Results before March 31, 2006 are from surveys conducted by Gallup.

Question text noted in parentheses was rotated or randomized. Values less than 0.5 percent are indicated by an asterisk (\*).

## NOTE ABOUT CROSSTABS

Interviews were conducted among a representative sample of the adult population, age 18 or older, of the United States. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum n=125 unweighted cases. Results for subgroups with fewer than n=125 unweighted cases are not displayed and instead are denoted with "SN" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.

**EMBARGOED FOR RELEASE:  
Monday, March 9 at 4:00 p.m.**

A1. Do you approve or disapprove of the way Donald Trump is handling his job as president?

<b>Ebola</b>					
2014 Oct 24-26**	7%	19%	33%	40%	*
**QUESTION WORDING: How likely do you think it is that someone in your local community will be infected with the Ebola virus in the next few weeks -- very likely, somewhat likely, not too likely, or not likely at all?					

Q8. Overall, how prepared do you think you are to deal with a coronavirus infection if you or someone in your family contracted the virus? Would you say you feel very prepared, somewhat prepared, not too prepared, or not at all prepared to respond to that? [RESPONSES ROTATED IN ORDER FOR HALF/IN REVERSE ORDER FOR HALF]

	NET Prepared	Very prepared	Somewhat prepared	NET Not prepared	Not too prepared	Not at all prepared	No opinion
March 4-7, 2020	68%	24%	44%	31%	16%	15%	1%

Q9. Which of the following statements comes closer to your view about how the federal government should handle people who are travelling to the U.S. from places where outbreaks of the novel coronavirus have occurred? [RESPONSES ROTATED]

	The government should prevent all of them from entering the U.S.	The government should screen all of them for signs that they have novel coronavirus and quarantine those who may be infected, but let those who do not show any symptoms enter the U.S.	No opinion
March 4-7, 2020	31%	65%	4%

#### **MORE ON METHODOLOGY**

A total of **1,211** adults, including an oversample of **206** adults living in 15 battleground states: Arizona, Colorado, Florida, Georgia, Maine, Michigan, Minnesota, Nevada, New Hampshire, New Mexico, North Carolina, Ohio, Pennsylvania, Virginia, and Wisconsin, were interviewed by telephone nationwide by live interviewers calling both landline and cell phones. Oversampled states have been weighted to represent their proper share of the adult population. Interviews were conducted in English and Spanish. Among the entire sample, **34%** described themselves as Democrats, **29%** described themselves as Republicans, and **37%** described themselves as independents or members of another party.

All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, and telephone usage.

Results for the full sample have a margin of sampling error of +/- 3.3 percentage points. For the sample of 1,084 registered voters, it is +/- 3.5 percentage points. For the subset of 540 Democrats and Democratic-leaning independents who are registered to vote, it is +/- 5.0 percentage points. For the subset of 573 adults living in the 15 battleground states, it is +/- 5.0 percentage points.

Interviews were conducted among a representative sample of the adult population, age 18 or older, of the United States. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum n=125 unweighted cases. Results for subgroups with fewer than n=125 unweighted cases are not displayed and instead are denoted with "**SN**" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.
