

1 Braxton Way Suite 125 Glen Mills, PA 19342
484-840-4300 www.ssrs.com

OVERVIEW

The study was conducted for CNN via telephone by SSRS, an independent research company. Interviews were conducted from October 23 to October 30, 2020 among a sample of **1,007** respondents who live in North Carolina. The landline total respondents were **350** and there were **657** cell phone respondents. The margin of sampling error for total respondents is +/-3.8 at the 95% confidence level. The design effect is 1.52. For results among the 932 registered voters, the margin of sampling error is +/-4.0 and for results among the 901 likely voters, it is +/-4.0. More information about SSRS can be obtained by visiting www.ssrs.com.

Question text noted in parentheses was rotated or randomized. Values less than 0.5 percent are indicated by an asterisk (*).

NOTE ABOUT CROSTABS

Interviews were conducted among a representative sample of the adult population, age 18 or older, of North Carolina. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum n=125 unweighted cases. Results for subgroups with fewer than n=125 unweighted cases are not displayed and instead are denoted with "SN" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.

**EMBARGOED FOR RELEASE:
Saturday, October 31 at 5:00 p.m.**

(Respondents who are registered to vote, N=932)

P1. Suppose that the presidential election were being held today and you had to choose between Joe Biden and Kamala Harris as the Democratic Party’s candidates, Donald Trump and Mike Pence as the Republican Party’s candidates, Jo Jorgensen and Spike Cohen, the Libertarians, and Howie Hawkins and Angela Walker, the Green Party candidates. Who would you be more likely to vote for?

P1a. As of today, do you lean more toward...

[MAJOR PARTY OPTIONS ALWAYS FIRST AND ROTATED IN ORDER FOR HALF/IN REVERSE ORDER FOR HALF. THIRD PARTY OPTIONS ROTATED]

P1/P1A COMBO TABLE

MORE ON METHODOLOGY

A total of **1,007** adults who live in North Carolina were interviewed by telephone by live interviewers calling both landline and cell phones. Interviews were conducted in English and Spanish. Among the entire sample, 31% described themselves as Democrats, 30% described themselves as Republicans, and 38% described themselves as independents or members of another party.

All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect Census figures for gender, race, age, education, state region, and telephone usage.

Results for the full sample have a margin of sampling error of +/- 3.8 percentage points. For the subset of 932 registered voters, it is +/- 4.0 percentage points. For the sample of 901 likely voters, it is +/-4.0 percentage points.

Interviews were conducted among a representative sample of the adult population, age 18 or older, of North Carolina. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum n=125 unweighted cases. Results for subgroups with fewer than n=125 unweighted cases are not displayed and instead are denoted with "**SN**" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.
