Registered Voters			
November 2-5, 2017	35%	62%	4%
Sept. 17-20, 2017	35%	59%	6%

*Asked of Half Sample

A total of 1,021 adults were interviewed by telephone nationwide by live interviewers calling both landline and cell phones. Interviews were conducted in English and Spanish. Among the entire sample, 32% described themselves as Democrats, 24% described themselves as Republicans, and 44% described themselves as independents or members of another party.

All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, and telephone usage.

Results for the full sample have a margin of sampling error of +/-3.6 percentage points. For the sample of 910 registered voters, it is +/-3.8 percentage points.

Crosstabs on the following pages only include results for subgroups with enough unweighted cases to produce a sampling error of +/-8.5 percentage points or less once adjusted for design effect. Some subgroups represent too small a share of the national population to produce crosstabs with an acceptable sampling error. Interviews were conducted among these subgroups, but results for groups with a design-effect adjusted sampling error larger than +/-8.5 percentage points are not displayed and instead are denoted with "N/A".
