

CNN January 2018

The study was conducted for CNN via telephone by SSRS, an independent research company. Interviews were conducted from January 14, 2017 - January 18, 2018 among a sample of 1,005 respondents, no interviewing took place on January $16^{\text {th }}$ due to weather conditions at the call center locations. The landline total respondents were 404 and there were $\mathbf{6 0 1}$ of cell phone respondents. The margin of sampling error for total respondents is $+/-3.7$ at
the $95 \%$ confidence level. The design effect is 1.4. More information about SSRS can be obtained by visiting www.ssrs.com. Unless otherwise noted, results beginning with the March 31-April 2, 2006 survey and ending with the April 22-25, 2017 survey are from surveys conducted by ORC International. Results before March 31, 2006 are from surveys conducted by Gallup.

## EMBARGOED FOR RELEASE: Tuesday, January 23 at Noon

Q13. (FV1) We'd like to get your overall opinion of some people in the news. As I read each name, please say if you have a favorable or unfavorable opinion of these people -- or if you have never heard of them.

| Bernie Sanders | Favorable opinion | Unfavorable <br> opinion | Never heard of <br> (vol.) | No opinion |
| :--- | :---: | :---: | :---: | :---: |
| January 14-18, 2018 | $57 \%$ | $32 \%$ | $5 \%$ | $6 \%$ |
| April 22-25, 2017 | $59 \%$ | $35 \%$ | $2 \%$ | $4 \%$ |
| June 16-19, 2016 | $59 \%$ | $35 \%$ | $3 \%$ | $4 \%$ |
| April 25-May 1, 2016 | $60 \%$ | $32 \%$ | $2 \%$ | $6 \%$ |
| March 17-20, 2016 | $48 \%$ | $43 \%$ | $5 \%$ | $5 \%$ |

| presidential nominee for 2016... |  |  |  |  |  |

Finally, turning to another subject...

Q30. How important would you say the health of a president is to his ability to be a good president -

|  | Very important | Somewhat <br> important | Not too <br> important | Not at all <br> important | No opinion |
| :--- | :---: | :---: | :---: | :---: | :---: |
| January 14-18, 2018 | $64 \%$ | $26 \%$ | $5 \%$ | $4 \%$ | $1 \%$ |
| June 21-23, 2004 | $70 \%$ | $26 \%$ | $3 \%$ | $1 \%$ | $*$ |

Q31. Which comes closer to your view - ?

|  | A president should publicly <br> release all medical <br> information that might affect <br> his ability to serve his term as <br> president | A president should have the <br> same right as every other <br> citizen to keep his medical <br> records private | No opinion |
| :--- | :---: | :---: | :---: |$\quad$|  |
| :--- |
| January 14-18, 2018 |

Q32. Do you think a president should - or should not - be required to take an annual examination to check the condition of his physical health?

|  | Yes, should | No, should not | No opinion |
| :--- | :---: | :---: | :---: |
| January 14-18, 2018 | $82 \%$ | $16 \%$ | $2 \%$ |
| June 21-23, 2004* | $84 \%$ | $16 \%$ | $*$ |

*Asked of half sample

Q33. Do you think a president should - or should not - be required to take an annual examination to check him for mental conditions, such as depression or Alzheimer's Disease?

|  | Yes, should | No, should not | No opinion |
| :--- | :---: | :---: | :---: |
| January 14-18, 2018 | $77 \%$ | $21 \%$ | $2 \%$ |
| June 21-23, 2004* | $79 \%$ | $21 \%$ | $*$ |

[^0]
## MORE ON METHODOLOGY

A total of $\mathbf{1 , 0 0 5}$ adults were interviewed by telephone nationwide by live interviewers calling both landline and cell phones. Interviews were conducted in English and Spanish. Interviews were conducted January 14-18, 2018, however no interviews were conducted on January $16^{\text {th }}$ due to weather conditions at call center locations. Among the entire sample, 33\% described themselves as Democrats, 24\% described themselves as Republicans, and 43\% described themselves as independents or members of another party.

All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, and telephone usage.

Results for the full sample have a margin of sampling error of $+/-3.7$ percentage points. For the sample of 913 registered voters, it is +/-3.8 percentage points.

Crosstabs on the following pages only include results for subgroups with enough unweighted cases to produce a sampling error of $+/-8.5$ percentage points or less once adjusted for design effect. Some subgroups represent too small a share of the national population to produce crosstabs with an acceptable sampling error. Interviews were conducted among these subgroups, but results for groups with a design-effect adjusted sampling error larger than $+/-8.5$ percentage points are not displayed and instead are denoted with "N/A".
