OVERVIEW

The study was conducted for CNN via telephone by SSRS, an independent research company. Interviews were conducted from **December 12-15, 2019** among a sample of **1,005** respondents. The landline total respondents were **356** and there were **649** cell phone respondents. The margin of sampling error for total respondents is +/- **3.7** at the 95% confidence level. The design effect is **1.43**. More information about SSRS can be obtained by visiting www.ssrs.com. Unless otherwise noted, results beginning with the March 31-April 2, 2006 survey and ending with the April 22-25, 2017 survey are from surveys conducted by ORC International. Results before March 31, 2006 are from surveys conducted by Gallup.

Question text noted in parentheses was rotated or randomized. Values less than 0.5 percent are indicated by an asterisk (*).

NOTE ABOUT CROSSTABS

Interviews were conducted among a representative sample of the adult population, age 18 or older, of the United States. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum n=125 unweighted cases. Results for subgroups with fewer than n=125 unweighted cases are not displayed and instead are denoted with "**SN**" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.

EMBARGOED FOR RELEASE:
Thursday, December 19 at 6:30 a.m.

FV1. We'd like to get your overall opinion of some people in the news. As I read each name, please say if you have a favorable or unfavorable opinion of these people - or if you have never heard of them. **[NAMES READ IN RANDOM ORDER]** (CONTINUED)

MORE ON METHODOLOGY

A total of **1,005** adults were interviewed by telephone nationwide by live interviewers calling both landline and cell phones. Interviews were conducted in English and Spanish. Among the entire sample, **32**% described themselves as Democrats, **27**% described themselves as Republicans, and **42**% described themselves as independents or members of another party.

All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, and telephone usage.

Results for the full sample have a margin of sampling error of +/- 3.7 percentage points. For the sample of 888 registered voters, it is +/- 4.0 percentage points. For the subset of 408 Democrats and Democratic-leaning independents who are registered to vote, it is +/- 5.8 percentage points.

Interviews were conducted among a representative sample of the adult population, age 18 or older, of the United States. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum n=125 unweighted cases. Results for subgroups with fewer than n=125 unweighted cases are not displayed and instead are denoted with "**SN**" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.

CNN/SSRS Poll -- December 12, 2019 to December 15, 2019 (Dem/Dem-leaning independents)
TABLE 071
Question DP1/Q11
DP1. I'm going to read a list of people who are running in the Democratic primaries for president in 2020.
After I read all the names, please tell me which of those candidates you would be most likely to support for the
Democratic nomination for president in 2020, or if you would support someone else.
11. Would you say you will definitely support that candidate, or is it possible you might change your mind?
Base: Respondents who are Democrats/Democratic-leaning independents and are registered to vote

	Total	Men	Women	White	Non-white	Reg. voter
