OVERVIEW

The study was conducted for CNN via telephone by SSRS, an independent research company. Interviews were conducted from July 18 to July 24, 2020 among a sample of **1,002** respondents who live in Arizona. The landline total respondents were **351** and there were **651** cell phone respondents. The margin of sampling error for total respondents is +/-3.6 at the 95% confidence level. The design effect is 1.34. For results among the 873 respondents who are registered to vote the margin of sampling error is +/-3.8. More information about SSRS can be obtained by visiting www.ssrs.com.

Question text noted in parentheses was rotated or randomized. Values less than 0.5 percent are indicated by an asterisk (*).

NOTE ABOUT CROSSTABS

Interviews were conducted among a representative sample of the adult population, age 18 or older, of Arizona. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum n=125 unweighted cases. Results for subgroups with fewer than n=125 unweighted cases are not displayed and instead are denoted with "**SN**" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.

EMBARGOED FOR RELEASE:
Sunday, July 26 at 8:00 a.m.

(Respondents who are registered to vote, N=873)
P1. Suppose that the presidential election were being held today and you had to choose between Joe Biden as the Democratic Party's candidate, and Donald Trump as the Republican Party's candidate. Who would you be more likely to vote for?
P1a. As of today, do you lean more toward...
[NAMES ROTATED IN ORDER FOR HALF/IN REVERSE ORDER FOR HALF]

P1/P1A COMBO TABLE

	Joe Biden, the Democrat	Donald Trump, the Republican	Other (vol.)	Neither (vol.)	No opinion
July 18-24, 2020	49%	45%	1%	3%	2%

(Respondents who are registered to vote and would vote for Biden, N=439)
P2B. Is that more a vote FOR Joe Biden or more a vote AGAINST Donald Trump?

	Vote for Biden	Vote against Trump	No opinion
July 18-24, 2020	39%	56%	5%

(Respondents who are registered to vote and would vote for Trump, N=397)
P2T. Is that more a vote FOR Donald Trump or more a vote AGAINST Joe Biden?

	Vote for Trump	Vote against Biden	No opinion
July 18-24, 2020	72%	23%	4%

(Respondents who are registered to vote, N=873)
S1. If the election for U.S. Senate were held today and the candidates were Mark Kelly, the Democrat, and Martha McSally, the Republican, who would you be more likely to vote for?
S1a. As of today, do you lean more toward…

V1B. If you had to choose now, which way would you most prefer to vote in November? **[ITEMS READ IN RANDOM ORDER]**

	On election day, by going to a polling place and voting in-person	Early, by going to a polling place and casting an early ballot	By-mail, by sending in an absentee ballot before election day	No opinion
July 18-24, 2020	23%	14%	61%	2%

MORE ON METHODOLOGY

A total of **1,002** adults who live in Arizona were interviewed by telephone by live interviewers calling both landline and cell phones. Interviews were conducted in English and Spanish. Among the entire sample, 26% described themselves as Democrats, 26% described themselves as Republicans, and 48% described themselves as independents or members of another party.

All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect Census figures for gender, race, age, education, state region, and telephone usage.

Results for the full sample have a margin of sampling error of +/- 3.6 percentage points. For the subset of 873 respondents who are registered to vote, it is +/- 3.8 percentage points.

Interviews were conducted among a representative sample of the adult population, age 18 or older, of Arizona. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum n=125 unweighted cases. Results for subgroups with fewer than n=125 unweighted cases are not displayed and instead are denoted with "**SN**" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.
