OVERVIEW

The study was conducted for CNN via telephone by SSRS, an independent research company. Interviews were conducted from **January 9-14, 2021** among a sample of **1,003** respondents. The landline total respondents were **253** and there were **750** cell phone respondents. The margin of sampling error for total respondents is +/- **3.7** at the 95% confidence level. The design effect is **1.40**. More information about SSRS can be obtained by visiting www.ssrs.com. Unless otherwise noted, results beginning with the March 31-April 2, 2006 survey and ending with the April 22-25, 2017 survey are from surveys conducted by ORC International. Results before March 31, 2006 are from surveys conducted by Gallup.

Question text noted in parentheses was rotated or randomized. Values less than 0.5 percent are indicated by an asterisk (*).

NOTE ABOUT CROSTABS

Interviews were conducted among a representative sample of the adult population, age 18 or older, of the United States. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum N=125 unweighted cases. Results for subgroups with fewer than N=125 unweighted cases are not displayed and instead are denoted with "SN" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.

****QUESTION WORDING:** As you may know, removing a president from office involves two major steps in Congress. First, the House of Representatives must vote on whether there is enough evidence to bring a president to trial before the Senate. This step is called impeachment. Next, the Senate must vote on whether to remove the president from office, or not. As you may know, the House has now impeached Trump and the case has been sent to the Senate for trial. As of now, do you think the Senate should vote to convict Trump and remove him from office, or do you think the Senate should vote against conviction and removal?

MORE ON METHODOLOGY

A total of **1,003** adults were interviewed by telephone nationwide by live interviewers calling both landline and cell phones. Interviews were conducted in English and Spanish. Among the entire sample, **33%** described themselves as Democrats, **26%** described themselves as Republicans, and **41%** described themselves as independents or members of another party.

All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, population density, and telephone usage. The sample was also weighted to reflect partisan identification and lean computed from the weighted average of the current poll plus three recent CNN polls.

Results for the full sample have a margin of sampling error of +/- 3.7 percentage points.

Interviews were conducted among a representative sample of the adult population, age 18 or older, of the United States. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum n=125 unweighted cases. Results for subgroups with fewer than n=125 unweighted cases are not displayed and instead are denoted with "**SN**" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.
