

OVERVIEW

The study was conducted for CNN via telephone by SSRS, an independent research company. Interviews were conducted from **April 21-26, 2021** among a sample of **1,004** respondents. The landline total respondents were **227** and there were **777** cell phone respondents. The margin of sampling error for total respondents is +/- **3.6** at the 95% confidence level. The design effect is **1.36**. More information about SSRS can be obtained by visiting www.ssrs.com. Unless otherwise noted, results beginning with the March 31-April 2, 2006 survey and ending with the April 22-25, 2017 survey are from surveys conducted by ORC International. Results before March 31, 2006 are from surveys conducted by Gallup.

Question text noted in parentheses was rotated or randomized. Values less than 0.5 percent are indicated by an asterisk (*).

NOTE ABOUT CROSSTABS

Interviews were conducted among a representative sample of the adult population, age 18 or older, of the United States. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum N=125 unweighted cases. Results for subgroups with fewer than N=125 unweighted cases are not displayed and instead are denoted with "**SN**" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.

EMBARGOED FOR RELEASE:

Thursday, April 29 at 4:00 p.m.

Q12. Based on what you know right now about the coronavirus outbreak in the area where you live, would you feel comfortable or not comfortable returning to your regular routine today?

	Comfortable	Not comfortable	Have already returned to regular routine (vol.)	No opinion
April 21-26, 2021*	63%	32%	4%	*
October 23-26, 2020	50%	48%	--	2%
October 1-4, 2020	49%	50%	--	1%
August 12-15, 2020	46%	52%	--	2%
June 2-5, 2020	49%	50%	--	1%
May 7-10, 2020	41%	58%	--	1%

*Volunteered response option "Have already returned to regular routine (vol.)" included beginning April 2021.

COMPARE TO:

As you may know, the federal government's social distancing guidelines are in place through April 30. If those guidelines were lifted at that time, do you think you would feel comfortable or not comfortable returning to your regular routine?

	Comfortable	Not comfortable	No opinion
April 3-6, 2020	37%	60%	3%

Q13. Have you personally received at least one dose of a coronavirus vaccine, or not?

	Yes, have received at least one dose of a coronavirus vaccine	No, have not received at least one dose of a coronavirus vaccine	No opinion
April 21-26, 2021	55%	45%	1%
March 3-8, 2021	23%	76%	*

(Respondents who have not personally received at least one dose of a coronavirus vaccine, N=383)

Q14. Now that multiple vaccines have been approved for use and are beginning to be made available to the public, will you, personally, try to get a coronavirus vaccine, or not?

	Yes, will try to get vaccinated	No, will not try to get vaccinated	No opinion
April 21-26, 2021	36%	58%	6%
March 3-8, 2021	59%	36%	4%

Q13. Have you personally received at least one dose of a coronavirus vaccine, or not?

Q14. Now that multiple vaccines have been approved for use and are beginning to be made available to the public, will you, personally, try to get a coronavirus vaccine, or not?

MORE ON METHODOLOGY

A total of **1,004** adults were interviewed by telephone nationwide by live interviewers calling both landline and cell phones. Interviews were conducted in English and Spanish. Among the entire sample, **32%** described themselves as Democrats, **25%** described themselves as Republicans, and **43%** described themselves as independents or members of another party.

All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, population density, and telephone usage.

Results for the full sample have a margin of sampling error of +/- 3.6 percentage points.

Interviews were conducted among a representative sample of the adult population, age 18 or older, of the United States. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum n=125 unweighted cases. Results for subgroups with fewer than n=125 unweighted cases are not displayed and instead are denoted with "**SN**" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.
